

Lost Pet

Sampson

Breed/Type: Labrador

Gender: Male

Age: Adult

Reward: no

Location: Clayton, Barber Mill Rd

Description: Lost our Male black lab (mostly lab that is). He is wearing a new blue collar that my wife put on him Wednesday 10/12- which was the day he got out of our yard. Unfortunately, it didn't have our number attached. Pup is a black mid- sized lab mix (about 60 lbs). He escaped from our yard Wednesday near Barber Mill Rd in Clayton. His adventures usually involve puppy re-population. If your female is in heat (any size, any shape -he culls nothing) and you are within 20 miles of our location, you aren't safe from having a litter of puppies due to his lascivious desires! If you have him or if you have seen him, please contact us. I will happily retrieve him from your domicile. I have warned him multiple times of the consequences of his adventures. If I can get him back, he will be slightly lighter after our next vet visit! My kids are tremendously unhappy that he is gone!! Please help!
