

Lost Pet

Mittens

Breed/Type: Other

Gender: Female

Age: Baby

Reward: no

Location: Wake Forest, 10600 common oaks dr, Raleigh, NC

Description: My coworker found her and asked our work group chat if anyone wanted her since he had too many cats already! So we took her and we believe she is a female baby calico somewhere between 10-12 weeks old but, not certain. Can't remember if coworker said she was/not microchipped but, don't believe she is. If you have any info, please contact my phone number via text first, then regular calls (as I do not pickup random numbers due to spam callers).
