

Lost Pet

Mittens

Breed/Type: Other

Gender: Female

Age: Baby

Reward: no

Location: Wake Forest, 10600 common oaks dr, Raleigh, NC

Description: She is a sweet baby calico, probably somewhere between 10-12 weeks old. She was found by my coworker in the wake forest area at his home and he offered her to any of his coworkers and I happened to be the one to take her off his hands, as he already has 3 himself. Not sure if she belongs to anyone, we do plan on taking her to the vet to see if she has a microchip, we both just also work often. We are taking really good care of her so please know she is in good hands! Please reach out to my phone number via text first, as I do not answer my phone much due to spam callers.
